# Davčno potrjevanje računov / *Fiscal verification of invoices*

TEHNIČNE SPECIFIKACIJE / *TECHNICAL SPECIFICATIONS*

Verzija 1.3 / *Version 1.3*

### Identifikacija dokumenta / *Document identification*

Naziv dokumenta / <i>Name of the document:</i>	<b>Tehnične specifikacije za davčno potrjevanje računov /</b> <b><i>Technical specifications for fiscal verification of invoices</i></b>
Zadnja sprememba / <i>Last change</i>	7.10.2015
Verzija in status / <i>Version and status</i>	V1.3, Delovna verzija / <i>V1.3, Working document</i>

### Spremembe dokumenta

Verzija / <i>Version</i>	Datum / <i>Date</i>	Opis dopolnitev in/ali referenčna oznaka poglavja / <i>Description of additions and/or reference mark of the chapter</i>
1.0	<b>1.9.2015</b>	Prva verzija / <i>First version</i>
1.1.	<b>4.9.2015</b>	Odpravljena napaka v C# primeru izračuna ZOI. / <i>Error fixed in C# case of ZOI calculation</i>  Popravljen JSON shema (element AmountType) / <i>Corrected JSON schema (element AmountType)</i>
1.2	<b>21.9.2015</b>	Tabela o vsebini in obliki sporočil je dopolnjena z XML elementi (poglavji 3.1.1. in 3.2.1.) / <i>Table on the content and form of messages is completed with XML elements (chapters 3.1.1. and 3.2.1.)</i>  Dodan opis TLS (poglavje 2) / <i>TLS description is added (Chapter 2)</i>  Dodan angleški prevod / <i>English translation is added</i>
1.3	<b>7.10.2015</b>	Dodana navodila za izpis QR kode, PDF417 kode, Code 128 (poglavje 11) / <i>Instructions for printing QR code, code PDF417 and Code 128 are added (chapter 11)</i>  Dodan naslov spletne strani za preverjanje poslanih podatkov v test okolju (poglavje 6.1) / <i>Web page url for verifying invoices is added (chapter 6.1)</i>  Sprememba enosmerne TLS komunikacije v dvosmerno TLS komunikacijo (poglavje 2) / <i>Changing one-way TLS to two-way TLS (chapter 2)</i>

# 1. UVOD / INTRODUCTION

V tem dokumentu je opisan način povezovanja med davčnimi zavezanci ter informacijskim sistemom finančne uprave za namene potrjevanja računov. Dokument je namenjen vsem zainteresiranim razvijalcem, ki bodo sodelovali pri realizaciji potrjevanja računov na strani zavezancev. / *This document describes the method for connecting taxpayers and financial administration's information system for purposes of invoice verification. Document is intended for all interested software developers, who will participate in realisation of invoice verification on behalf of taxpayers.*

Dokument zajema vsa sporočila za izmenjavo podatkov, procese za izmenjavo, definirani so podatkovni sklopi in pravila, ki jih je potrebno upoštevati pri komunikaciji. / *The document includes all messages for data exchange, processes for exchange, data sets and rules, which shall be taken into consideration at communication, are defined.*

Izmenjava podatkov se izvaja preko spletne storitve v formatu XML ali JSON. S tem je zagotovljen od tehnologije neodvisen način izmenjave podatkov med zavezanci in FURS. / *Exchange of data is performed via the web service in the XML format or JSON. This provides exchange of data between persons liable and the Financial Administration, which does not depend on technology.*

<b>Kratice / Abbreviations</b>	<b>Opis / Description</b>
ISFU	Informacijski sistem finančne uprave / <i>Information system of the financial administration</i>
EOR	Enkratna identifikacijska oznaka računa / <i>Unique identification invoice mark</i>
ZOI	Zaščitna oznaka izdajatelja računa / <i>Protective mark of the invoice issuer</i>
FURS	Finančna uprava Republike Slovenije

## 2. DIGITALNA POTRDILA (PUBLIC KEY INFRASTRUCTURE) / DIGITAL CERTIFICATES (PUBLIC KEY INFRASTRUCTURE)

Izdajatelj namenskih digitalnih potrdil za namen davčnega potrjevanja računov bo Ministrstvo za javno upravo (v nadaljevanju MJU). V ta namen sta bila v okviru MJU kreirana dva namenska overitelja / *The Ministry of Public Administration (hereinafter MJU) will be the issuer of digital certificates for invoice fiscal verification purposes. For this purpose two certification-service-providers have been created within the MJU:*

- Tax CA Test (uporaba namenskih potrdil v testnem okolju / *usage of certificates for invoice fiscal verification purposes in the test environment*)
- Tax CA (uporaba namenskih potrdil v produkcijskem okolju / *usage of certificates for invoice fiscal verification purposes in the production environment*).

S strani ISFU bodo sprejeta samo sporočila, katera bodo podpisana z zgoraj navedenimi namenskimi digitalnimi potrdili. V produkcijskem okolju ni dovoljeno pošiljanje sporočil podpisanih s testnimi potrdili in obratno. / *Only messages, which will be signed with the above-mentioned digital certificates for invoice fiscal verification purposes, will be accepted by ISFU. In the production environment it is not allowed to send messages signed by test certificates and vice versa.*

Na FURS strani se bodo uporabljali dve digitalni potrdili / *On FURS website two digital certificates will be used:*

- strežniško potrdilo za vzpostavitev TLS seje / *Server certificate for establishing TLS session*
  - o testno okolje / *Test environment:*
    - Izdajatelj / *Issuer: sitest-ca*
    - Nosilec / *Holder: CN = blagajne-test.fu.gov.si*
    - Javni ključ potrdila / *Certificate public key: <http://datoteke.durs.gov.si/dpr/files/test-tls.cer>*
  - o produkcijsko okolje / *Production environment:*
    - Izdajatelj / *Issuer:*
    - Nosilec / *Holder:*
    - Javni ključ potrdila / *Certificate public key:*
- aplikacijsko potrdilo za digitalno podpisovanje sporočil / *application certificate for digital signing of messages*
  - o testno okolje / *test environment:*
    - Izdajatelj / *issuer: CN = Tax CA Test;*
    - Nosilec / *holder: CN = FURS OU = 77695771 OU = DavPotRacTEST*
    - Javni ključ potrdila / *certificate public key: <http://datoteke.durs.gov.si/dpr/files/test-sign.cer>*
  - o produkcijsko okolje / *production environment:*
    - Izdajatelj / *issuer: CN = Tax CA;*
    - Nosilec / *holder: CN = FURS OU = 77695771 OU = DavPotRac*
    - Javni ključ potrdila / *Certificate public key:*

Za vzpostavitev varne seje se uporablja dvosmerni protokol TLS. Odjemalec za avtentikacijo in vzpostavitev TLS seje uporabi namensko digitalno potrdilo (postopek pridobitve je opisan v poglavju 2.2.). Omogočena je uporaba TLS protokola verzij 1.0, 1.1 in 1.2. Verziji TLS 1.0 in 1.1 bosta omogočeni do 30.6.2018. Iz varnostnega stališča priporočamo uporabo TLS protokola verzije 1.2 oz. čimprejšnji prehod na to verzijo / *Two-way TLS protocol is used for establishing a safe session. Client must use digital certificate for invoice fiscal verification purposes for authentication and establishing TLS session (procedure for acquiring digital certificate is described in chapter 2.2). It is possible to use TLS protocol of versions 1.0, 1.1 and 1.2. Versions TLS 1.0 and 1.1 will be enabled until 30.6.2018. From the safety point of view we recommend using TLS protocol of 1.2 version or switching over to this version as soon as possible.*

## 2.2. POSTOPEK PRIDOBIVANJA PRODUKCIJSKIH DIGITALNIH POTRDIL/JAVNIH KLJUČEV / PROCEDURE FOR ACQUIRING PRODUCTION DIGITAL CERTIFICATES/PUBLIC KEYS

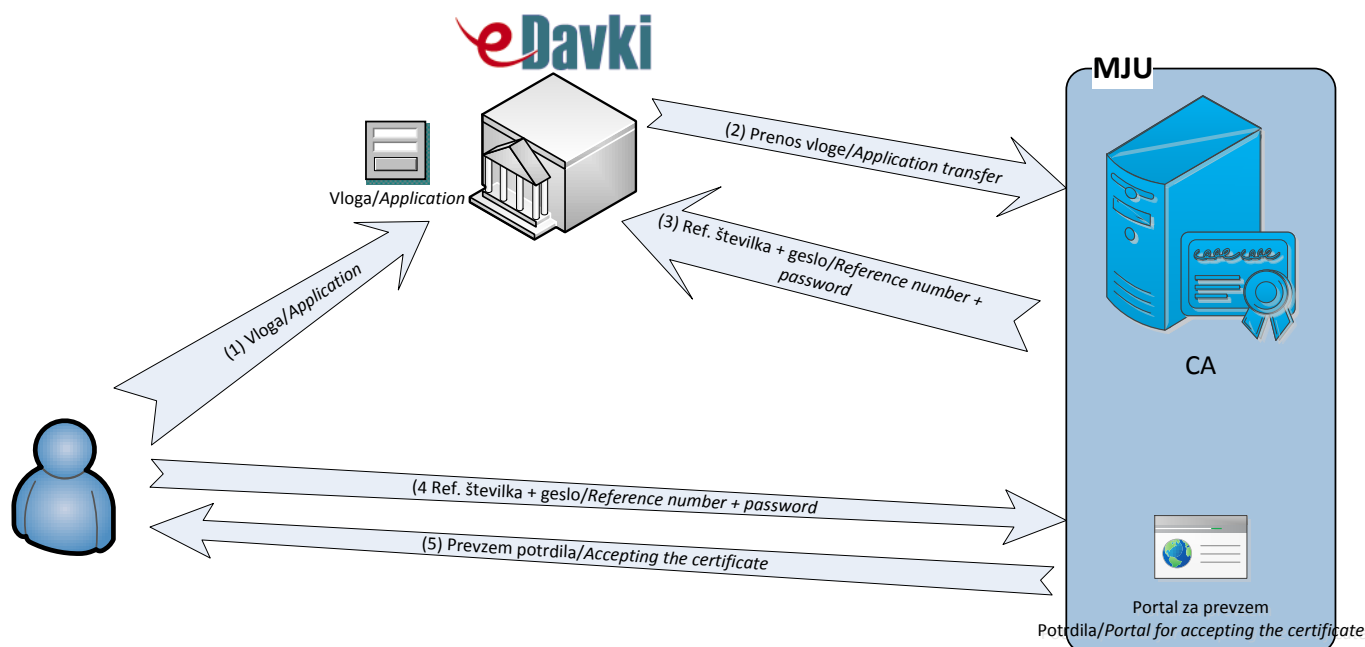

Postopek se začne z oddajo vloge za pridobitev digitalnega potrdila v sistemu eDavki (korak 1 v sliki 1). Vlogo lahko odda / *The procedure starts with submitting the digital certificate application in eDavki system (step 1 in Picture 1). The application may be submitted by:*

- zakoniti zastopnik subjekta / *legal representative of the entity,*
- splošni pooblaščenec / *general authorised representative,*
- posebni pooblaščenec / *special authorised representative.*

Vloga se posreduje na MJU (korak 2 v sliki 1), kjer se kreirata referenčna številka in geslo za prevzem digitalnega potrdila. Referenčna številka in geslo se objavita v sistemu eDavki v portalu zavezanca (korak 3 v sliki 1). Zavezanec z vnosom referenčne številke in gesla na portalu MJU (korak 4 v sliki 1), prevzame potrdilo v p12 obliki ((korak 5 v sliki 1). Datoteka je zaščitena z enakim geslom kot je uporabljeno za prevzem. / *The application is submitted to the MJU (step 2 in Picture 1), where the reference number and password for accepting the digital certificate are created. The reference number and password are published in eDavki system in the portal of the person liable (step 3 in Picture 1). The person liable with entry of the reference number and password on MJU portal (step 4 in Picture 1) accepts the certificate in p12 form (step 5 in Picture 1). The file is protected with the same password as it is used for acceptance.*

Slika 1: Pridobivanje namenskih digitalnih potrdil / Picture 1: Acquisition of digital certificates for invoice fiscal verification purposes

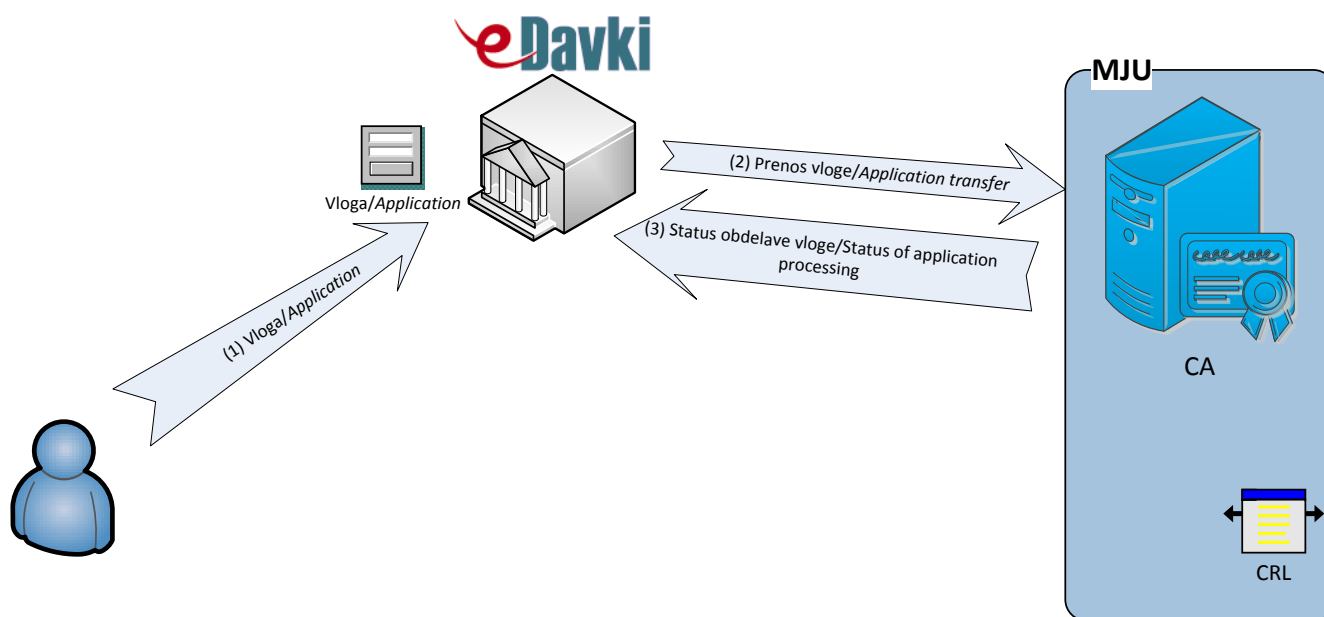

## 2.3. POSTOPEK PREKLICA DIGITALNIH POTRDIL / PROCEDURE FOR WITHDRAWAL OF DIGITAL CERTIFICATES

Postopek se začne z oddajo vloge za preklic v sistemu eDavki (korak 1 v sliki 2). Vlogo za preklic v sistemu eDavki lahko odda / The procedure starts with submitting the application for withdrawal in eDavki system (step 1 in Picture 2). The application for withdrawal in eDavki system may be submitted by::

- zakoniti zastopnik subjekta / legal representative of the entity,
- splošni pooblaščenec / general authorised representative,
- posebni pooblaščenec / special authorised representative.

Vloga se posreduje na MJU, kjer se izvede preklic potrdila in objavi CRL. / The application is submitted to the MJU, where the withdrawal of the certificate is performed and CRL is published.

Slika 2: Preklic namenskih digitalnih potrdil / Picture 2: Withdrawal of digital certificates for invoice fiscal verification purposes

## 2.4 POSTOPEK PRIDOBIVANJA TESTNIH DIGITALNIH POTRDIL / PROCEDURE FOR ACQUIRING TEST DIGITAL CERTIFICATES

Za pridobitev testnega digitalnega potrdila je potrebno poslati elektronsko sporočilo na naslov [dev.blagajne.fu@gov.si](mailto:dev.blagajne.fu@gov.si). V sporočilu navedite naziv podjetja, katero bo razvijalo programsko rešitev za davčno potrjevanje računov in bo uporabljalo zahtevano digitalno potrdilo. Testna digitalna potrdila so izdana na naključno davčno številko in anonimiziran naziv (npr. »Testna oseba n«). / For acquisition of test digital certificates it is necessary to send an electronic message to the following address: [dev.blagajne.fu@gov.si](mailto:dev.blagajne.fu@gov.si). In the message you state the name of the company, which will develop the programme solution for fiscal verification of invoices and which will use the required digital certificate. Test digital certificates are issued on the basis of a random tax number and anonymised name (e.g. »test person n«).

Potrdila bodo dostavljena v obliki datoteke ».p12«. / Certificates will be delivered in the form of ».p12« file.

## 3. VRSTE POSLOVNIH SPOROČIL / *TYPES OF BUSINESS MESSAGES*

Davčni zavezanci so dolžni poslati na davčni organ Finančne uprave dva tipa sporočil: račun in podatke o poslovnih prostorih. Poleg izmenjave teh poslovnih sporočil lahko preverite delovanje povezave z sporočilom tipa »echo«. Spodaj bodo opisani postopki pošiljanja posameznih sporočil ter podrobnejše vsebine sporočil. / *Taxpayers shall send two types of messages to the Financial Administration: invoice and data about business premises. In addition to exchange of these business messages you can check working of the connection with the message of »echo« type. Below you will find described procedures for sending individual messages and detailed contents of messages.*

### 3.1. RAČUN / *INVOICE*

Sledeč diagram opisuje proces izdaje računa. / *The following diagram describes the process for issuing invoice.*

### 3.1.1. VSEBINA IN OBLIKA SPOROČILA TIPA RAČUN / CONTENT AND FORM OF THE MESSAGE OF THE INVOICE TYPE

Spodnja tabela prikazuje nabor podatkov ter njihovo obliko v strukturi računa. / *The table below presents the data set and their form in the invoice structure.*

Indeks / <i>Index</i>	Ime elementa / <i>Name of the element</i>	Uporaba/opis elementa / <i>Usage/description of the element</i>	Obvezen podatek  DA/NE / <i>Obligatory data</i> YES/NO	Tip podatka / <i>Type</i> of data	Zaloga vrednosti / <i>Stock of values</i>	<i>XML element</i>
Glava sporočila / <i>Message header</i>						
R_1.0	+ Identifikator sporočila / <i>Identifier of the message</i>	Enkratni identifikator sporočila. / <i>Unique identifier of the message</i>  Vsako sporočilo mora imeti enkratno identifikacijsko oznako.  Enako velja tudi pri pošiljanju sporočila, ki se zaradi napake pošilja ponovno. / <i>Every message shall have the unique identification mark. The same is obligatory also at sending of the message, which is resent due to an error.</i>	DA / <i>YES</i>	<i>Text</i>	<i>Min36, Max 36</i>	<i>InvoiceRequest /Header/MessagelD</i>
R_2.0	+ Datum in čas pošiljanja / <i>Date and time of sending</i>	Datum in čas pošiljanja sporočila. / <i>Date and time of sending the message</i>  LLLL-MM-DDTUU:MM:SS / <i>YYYY-MM-DDTHH:MM:SS</i>	DA / <i>YES</i>	<i>Date Time</i>		<i>InvoiceRequest /Header/DateTime</i>

Račun / <i>Invoice</i>						
R_3.0	+ Račun – elektronska naprava / <i>Invoice</i> – <i>electronic device</i>	Vpišejo se podatki o računu, ki je izdan z uporabo elektronske naprave. / <i>Data are entered about the invoice, which is issued with usage of the electronic device.</i>	DA, če je račun izdan preko elektronske naprave / <i>YES if the invoice is issued via the electronic device</i>			<i>InvoiceRequest /Invoice</i>
R_3.1	++ Davčna številka zavezanca / <i>Tax number of the person liable</i>	Vpiše se davčna številka zavezanca, ki je izdal račun. / <i>The tax number of the person liable, who has issued the invoice, is entered.</i>	DA / <i>YES</i>	<i>Text</i>	<i>Min8, Max8</i>	<i>InvoiceRequest /Invoice/TaxNu mber</i>
R_3.2	++Datum in čas izdaje računa / <i>Date and time of issuing the invoice</i>	Vpiše se datum in čas izdaje računa, ki je naveden na računu. / <i>Date and time of issuing the invoice, which is stated on the invoice, are entered.</i>  Podatek se vpiše v formatu LLLL-MM- DDTUU:MM:SS. / <i>The data is entered in the following format</i>  <i>YYYY-MM- DDTHH:MM:SS</i>	DA / <i>YES</i>	<i>Date Time</i>		<i>InvoiceRequest /Invoice/IssueD ateTime</i>
R_3.3	++ Način dodelitve številke računa / <i>Method for assigning the invoice</i>	Vpiše se oznaka načina dodeljevanja števil računom / <i>The mark is entered for the method of assigning numbers</i>	DA / <i>YES</i>	<i>Text</i>	<i>Min1, Max1</i>	<i>InvoiceRequest /Invoice/Numbe ringStructure</i>

	<i>number</i>	<p><i>to invoices:</i></p> <p>C – centralno na nivoju poslovnega prostora / <i>centrally at the level of business premises</i></p> <p>B – po posamezni elektronski napravi (blagajna) / <i>per individual electronic device (cash register)</i></p> <p>Oznaka pojasnjuje na kakšen način se računom dodeljujejo številke. / <i>The mark explains the method for assigning numbers to invoices.</i></p> <p>Številke računov se lahko dodeljujejo centralno na nivoju poslovnega prostora ali posamično na elektronski napravi za izdajanje računov. / <i>Invoice numbers may be assigned centrally at the level of business premises or individually on the electronic device for issuing invoices.</i></p>				
R_3.4	++ Številka računa / <i>Number of the invoice</i>	<p>Vpiše se številka izdanega računa. / <i>The number of the issued invoice is entered.</i></p> <p>Vpiše se tudi številka dokumenta, ki spreminja prvotni račun (dobropis,</p>	DA / <i>YES</i>			<i>InvoiceRequest /Invoice/Invoice Identifier</i>

		<p>storno,...) v primeru izvajanja postopka potrjevanja naknadne spremembe podatkov na računu, ki spreminja prvoten račun in se nanj nedvoumno nanaša. / <i>The number of the document is also entered, which changes the original invoice (credit, reversing, etc.) in cases of performing the procedure for verification of subsequent changes of data on the invoice, which changes the original invoice and refers to it with reasonable certainty.</i></p> <p>Številka računa je sestavljena iz treh delov / <i>The invoice number includes three parts:</i></p> <ul style="list-style-type: none"> <li>- Oznaka poslovnega prostora / <i>Mark of business premises</i></li> <li>- Oznaka elektronske naprave za izdajanje računov / <i>Mark of the electronic device for issuing invoices</i></li> <li>- Zaporedna številka računa / <i>Sequence number of the invoice</i></li> </ul>				
--	--	---	--	--	--	--

		<p>Številka računa se na računu navede v naslednji obliki / <i>The invoice number is stated on the invoice in the following form:</i></p> <p>oznaka poslovnega prostora-oznaka elektronske naprave-zaporedna številka računa / <i>mark of business premises-mark of the electronic device-sequence invoice number</i></p> <p>Primer / <i>Example:</i> TRGOVINA1-BLAG2-1234</p> <p>Podatki se vpisujejo ločeno. / <i>Data are entered separately.</i></p>				
R_3.4.1	+++ Oznaka poslovnega prostora / <i>Mark of business premises</i>	Vsebuje lahko samo črke in številke / <i>It may include only the following letters and numbers: 0-9, a-z, A-Z.</i>	DA / <i>YES</i>	<i>Text</i>	<i>Min1, Max20</i>	<i>InvoiceRequest /Invoice/Invoice Identifier/BusinessPremiseID</i>
R_3.4.2	+++ Oznaka elektronske naprave / <i>Mark of the electronic device</i>	Vsebuje lahko samo črke in številke / <i>It may include only the following letters and numbers: 0-9, a-z, A-Z.</i>	DA / <i>YES</i>	<i>Text</i>	<i>Min1, Max20</i>	<i>InvoiceRequest /Invoice/Invoice Identifier/ElectronicDeviceID</i>
R_3.4.3	+++ Zaporedna	Vsebuje lahko samo številke 0-9.	DA / <i>YES</i>	<i>Text</i>	<i>Min1,</i>	<i>InvoiceRequest /Invoice/Invoice</i>

	številka računa / <i>Sequence number of the invoice</i>	Niso dovoljene vodilne ničle. / <i>It may include only numbers 0-9. Zeros cannot be on the first place.</i>			<i>Max20</i>	<i>Identifier/InvoiceNumber</i>
R_3.5	++ Davčna številka oziroma identifikacijska oznaka za namene DDV kupca / <i>Tax number or identification mark for VAT purposes of the buyer</i>	Vpiše se davčna številka oziroma identifikacijska številka za namene DDV kupca oziroma naročnika v primeru, ko so ti podatki v skladu z davčnimi predpisi navedeni na računu.  Podatek se vpiše, če je naveden na računu. / <i>The tax number is entered or identification number for VAT purposes of the buyer or ordering party in cases when these data are stated on the invoice in accordance with tax regulations.</i>	DA, če so podatki navedeni na računu / <i>YES if data are stated on the invoice</i>	<i>Text</i>	<i>Min1, Max20</i>	<i>InvoiceRequest/Invoice/CustomerVATNumber</i>
R_3.6	++ Vrednost računa / <i>Value of the invoice</i>	Vnese se skupni znesek računa. Vpiše se znesek računa skupaj z DDV in ostalimi davki/dajatvami, zmanjšan za zneske popustov. / <i>The total amount of the invoice is entered. The amount of the invoice is entered together with VAT and other taxes/duties, decreased for amounts of</i>	DA / <i>YES</i>	<i>Decimal Number</i>	Številka / <i>Numbers: max 14</i>  Decimal / <i>Decimals: max 2</i>	<i>InvoiceRequest/Invoice/InvoiceAmount</i>

		<p><i>discounts.</i></p> <p>Decimalno ločilo je pika. / <i>The decimal separator is a dot.</i></p>				
R_3.7	++ Znesek povračil / <i>Amount of refunds</i>	<p>Vpiše se znesek povračil na računu, ki se priznajo kupcu (npr. na podlagi dobropisa za vračilo embalaže). / <i>The amount of refunds on the invoice, which are recognized to the buyer (e.g. on the basis of credit for returning packaging), is entered.</i></p> <p>Podatek se vpiše le, če na računu obstajajo povračila. / <i>The data is entered only if there are refunds on the invoice.</i></p> <p>Decimalno ločilo je pika. / <i>The decimal separator is a dot.</i></p>	DA, če obstajajo povračila / <i>YES if there are refunds</i>	<i>Decimal Number</i>	Številka / <i>Numbers: max 14</i> Decimali / <i>Decimals: max 2</i>	<i>InvoiceRequest / Invoice/ReturnsAmount</i>
R_3.8	++ Vrednost za plačilo / <i>Value for payment</i>	<p>Vpiše se znesek računa za plačilo. / <i>The amount of the invoice for payment is entered.</i></p> <p>Decimalno ločilo je pika. / <i>The decimal separator is a dot.</i></p>	DA / <i>YES</i>	<i>Decimal Number</i>	Številka / <i>Numbers: max 14</i> Decimali / <i>Decimals: max 2</i>	<i>InvoiceRequest / Invoice/PaymentAmount</i>

### 3.1.2. SHEMA SPOROČILA TIPA RAČUN / SCHEMA OF THE MESSAGE OF THE INVOICE TYPE

Iz zgornjega poglavja o vsebini sporočil tipa račun sledi, da lahko sporočilo tipa račun vsebuje samo enega izmed naslednjih dveh naborov podatkov / *From the chapter above on the content of messages of the invoice type it is evident that the message of the invoice type may include only one of the following two sets of data:*

- podatke o računu izdanem preko elektronske naprave / *data about the invoice issued via the electronic device*
- podatke o računu izdanem preko vezane knjige računov / *data about the invoice issued via the pre-numbered invoice book.*

Če je račun izdan preko elektronske naprave, vsebuje element / *If the invoice is issued via the electronic device, it includes the following element* <fu:Invoice>; če je izdan preko vezane knjige računov vsebuje element / *if it is issued via the pre-numbered invoice book, it includes the following element* <fu:SalesBookInvoice>.

Sledeća diagrama prikazujeta shemo sporočila tipa račun. Prvi diagram prikazuje detaljniju strukturu elementa / *The following diagrams present the schema of the message of the invoice type. The first diagram presents a detailed structure of the element <fu:Invoice>, drugi pa prikazuje detaljniju strukturu elementa / and the second one presents a detailed structure of the element <fu:SalesBookInvoice>.*

### 3.2.4. VSEBINA IN OBLIKA ODGOVORA NA SPOROČILO TIPA POSLOVNI PROSTOR / CONTENT AND FORM OF THE RESPONSE TO THE MESSAGE OF THE BUSINESS PREMISES TYPE

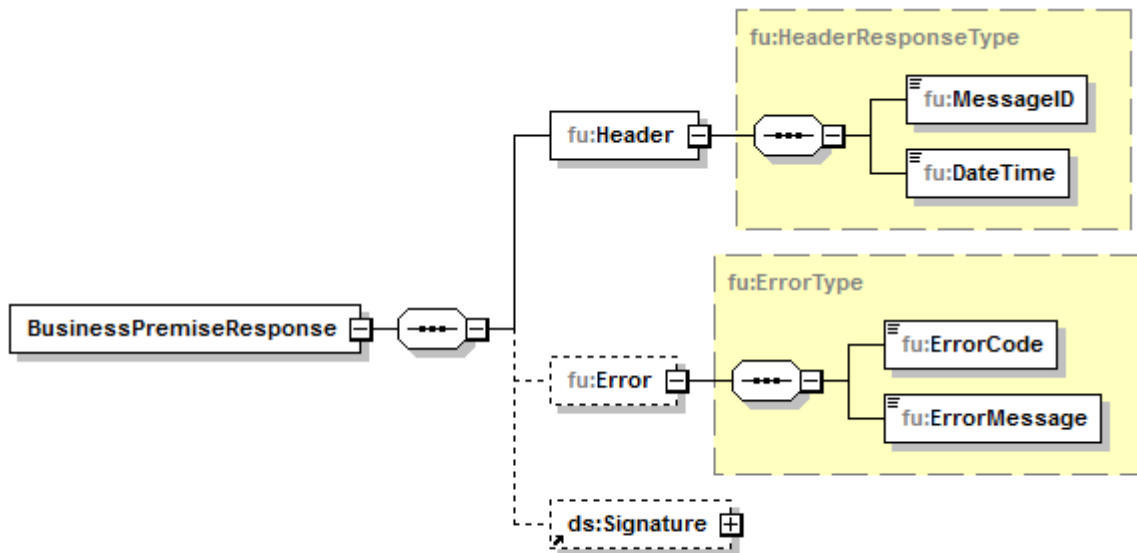

Nabor podatkov za odgovor na sporočilo tipa poslovni prostor. / *Set of data for the response to the message of the business premises type*

Ime elementa / <i>Name of the element</i>	Uporaba/opis elementa / <i>Usage/description of the element</i>	Obvezen podatek / <i>Obligatory data</i>  DA/NE / YES/NO	Tip podatka / <i>Data type</i>	Zaloga vrednosti / <i>Stock of values</i>
+ Glava sporočila / <i>Message header</i>				
++ Identifikator sporočila / <i>Message identifier</i>	Identifikator sporočila iz sporočila tipa poslovni prostor. / <i>Message identifier from the message of the business premises type</i>	DA / YES	<i>Text</i>	<i>Min36, Max 36</i>
++ Datum in čas pošiljanja / <i>Date and time of sending</i>	Datum in čas pošiljanja sporočila. / <i>Date and time of sending the message</i>  LLLL-MM-DDTUU:MM:SS /  YYYY-MM-DDTHH:MM:SS	DA / YES	<i>Date Time</i>	
+ Napake / <i>Errors</i>		NE / NO		
++Šifrant napake / <i>Error code table</i>	Napaka je opisana s formatom sXXX, kjer je XXX tri znakovna številka. / <i>The error is described with sXXX format where XXX is a three-character digit.</i>	NE / NO		
++Opis napake / <i>Error description</i>	Opisna napaka. / <i>Description error</i>	NE / NO		

### 3.2.5. SCHEMA ODGOVORA NA SPOROČILO TIPA POSLOVNI PROSTOR / *SCHEMA OF THE RESPONSE TO THE MESSAGE OF THE BUSINESS PREMISES TYPE*

Sledeča slika prikazuje shemo odgovora na sporočilo s podatki o poslovnem prostoru. / *The following picture presents the schema of the response to the message with data about business premises.*

Generated by XMLSpy

www.altova.com

### 3.2.6. PRIMER ODGOVORA NA SPOROČILO TIPA POSLOVNI PROSTOR / EXAMPLE OF THE RESPONSE TO THE MESSAGE OF THE BUSINESS PREMISES TYPE

Spodnji primer odgovora na sporočilo s podatki o poslovnem prostoru vsebuje podatke, ki so testni in niso nujno vsebinsko pravilni. / *The example below of the response to the message with data about business premises includes test data, which are not necessarily substantively accurate.*

Primer brez napake / *Example without an error:*

```
<fu:BusinessPremiseResponse Id="data">
  <fu:Header>
    <fu:MessageID>4e64a93a-40fa-4c02-afb1-488534b85e4c</fu:MessageID>
    <fu:DateTime>2015-08-25T12:03:33.449Z</fu:DateTime>
  </fu:Header>
</fu:BusinessPremiseResponse>
```

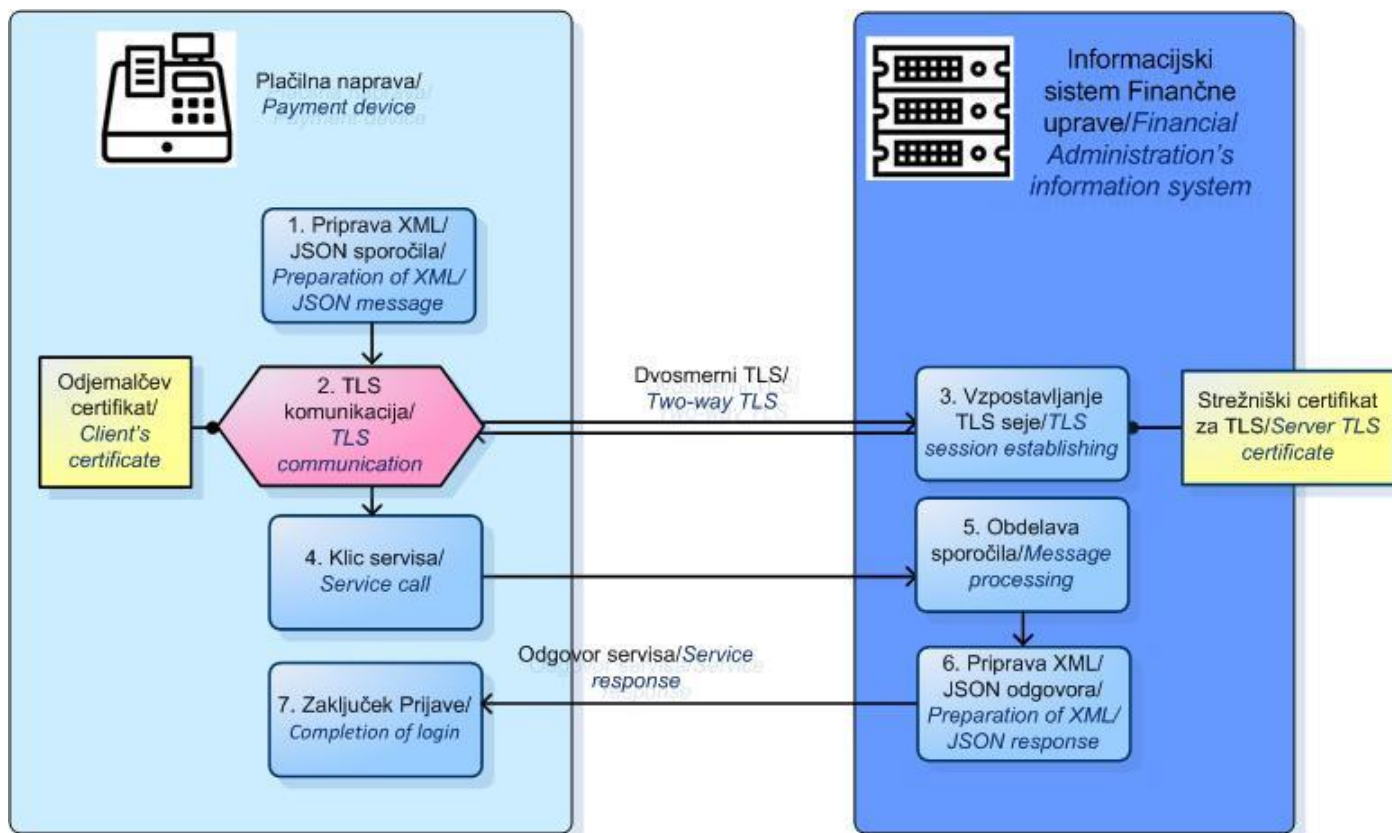

Primer z napako / *Example with an error:*

Sporočilo ni v skladu z XML shemo / *Message is not in compliance with XML schema*

```
<fu:BusinessPremiseResponse Id="data">
  <fu:Header>
    <fu:MessageID>4e64a93a-40fa-4c02-afb1-488534b85e4c</fu:MessageID>
    <fu:DateTime>2015-08-25T12:03:33.449Z</fu:DateTime>
  </fu:Header>
  <fu>Error>
    <fu:ErrorCode>s001</fu:ErrorCode>
    <fu:ErrorMessage>Sporočilo ni v skladu z XML shemo.</fu:ErrorMessage>
  </fu>Error>
</fu:BusinessPremiseResponse>
```

### 3.3. SPOROČILO TIPA »ECHO« / MESSAGE OF THE ECHO TYPE

Spodnji diagram opisuje proces tipa »echo«. / The diagram below describes the process of the echo type.

#### 3.3.1. PRIMER SPOROČILA TIPA »ECHO« / EXAMPLE OF THE ECHO TYPE MESSAGE

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/" xmlns:fu="http://www.fu.gov.si/"

  <soapenv:Body>
    <fu:EchoRequest>test</fu:EchoRequest>
  </soapenv:Body>
</soapenv:Envelope>
```

#### 3.3.2. PRIMER ODGOVORA NA SPOROČILO TIPA »ECHO« / EXAMPLE OF THE RESPONSE TO THE ECHO TYPE MESSAGE

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:xsd="http://www.w3.org/2001/XMLSchema" xmlns:fu="http://www.fu.gov.si/"
xmlns:ds="http://www.w3.org/2000/09/xmldsig#" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  <soapenv:Body>
    <fu:EchoResponse>test</fu:EchoResponse>
  </soapenv:Body>
</soapenv:Envelope>
```

## 4. ŠIFRANT NAPAK / ERROR CODE TABLE

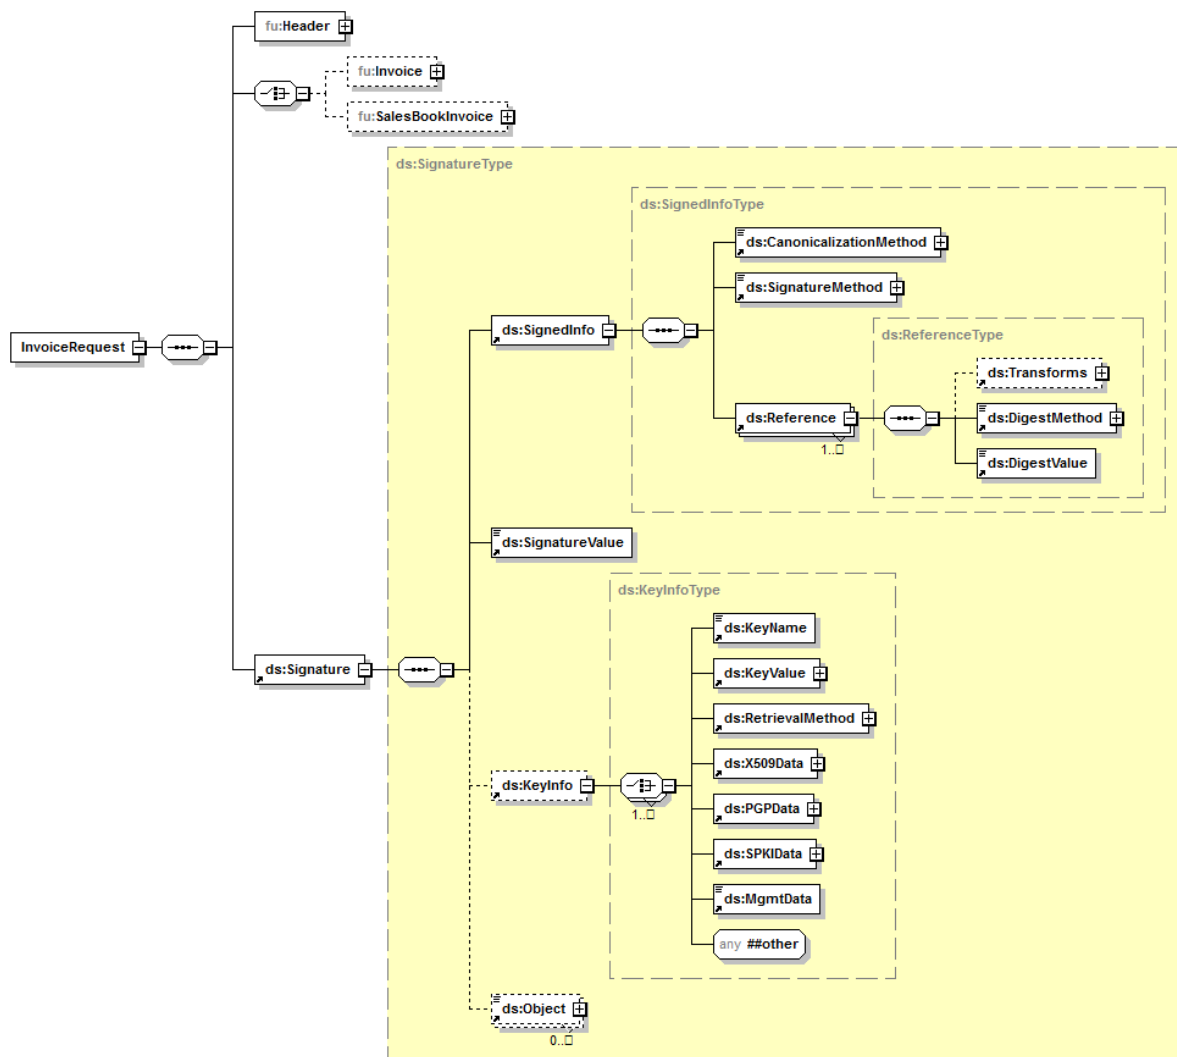

Šifra napake / <i>Error code</i>	Opis napake / <i>Error description</i>	Opomba / <i>Note</i>
S001	Sporočilo ni v skladu s shemo XML / <i>Message is not in compliance with XML schema</i>	
S002	Sporočilo ni v skladu s shemo JSON / <i>Message is not in compliance with JSON schema</i>	
S003	Digitalni podpis ni ustrezen / <i>Digital signature is not appropriate</i>	
S004	Identifikator digitalnega potrdila ni ustrezen / <i>Digital certificate identifier is not appropriate</i>	Za podano serijsko številko digitalnega potrdila ne obstaja digitalno potrdilo v ISFU / <i>There is no digital certificate in ISFU for the submitted serial number of the digital certificate</i>
S005	Davčna številka v sporočilu ni enaka davčni številki iz digitalnega potrdila / <i>Tax number in the message is not the same as the tax number from the digital certificate</i>	
S006	Podatki o poslovnem prostoru niso posredovani / <i>Data about business premises are not submitted</i>	Preverja se vrednost v elementu / <i>The value is checked in the element &lt;fu:BusinessPremiseID&gt; . Naveden poslovni prostor je potrebno predhodno prijaviti s pošiljanjem sporočila tipa poslovni prostor. / <i>It is necessary to report the stated business premises first with sending the message of the business premises type. Poslovni prostor ne sme biti označen kot zaprt / <i>Business premises shall not be marked as closed (fu:ClosingTag = »Z«)</i></i></i>
S007	Digitalno potrdilo je preklicano / <i>Digital certificate is withdrawn</i>	
S008	Digitalnemu potrdilu je potekla veljavnost / <i>The validity of the digital certificate is expired</i>	
S100	Sistemska napaka pri obdelavi	

	sporočila / <i>System error at processing of the message</i>	
--	--	--

## 5. ELEKTRONSKI PODPIS SPOROČIL V XML OBLIKI / ELECTRONIC SIGNATURE OF MESSAGES IN XML FORM

Sporočila je potrebno podpisati, da zagotovimo nespremenjenost vsebine. Za podpis XML-ja se uporablja način podpisovanja »XML enveloped signature«. Podpis se nahaja znotraj podpisanega elementa. /  
*Signatures shall be signed to provide for the unchanged content. »XML enveloped signature« is used for signing XML. The signature is located within the signed element.*

Podpis je definiran s shemo / *The signature is defined with the schema <http://www.w3.org/TR/2002/REC-xmldsig-core-20020212/xmldsig-core-schema.xsd>*

Generated by XMLSpy

www.altova.com

Primer podpisa s testnim certifikatom / *Example of the signature with the test certificate:*

```

## 6. POSTOPEK POVEZOVANJA ZAVEZANCEV NA IS FINANČNE UPRAVE / *PROCEDURE FOR CONNECTING PERSONS LIABLE WITH THE INFORMATION SYSTEM OF THE FINANCIAL ADMINISTRATION*

1. Zavezanec mora pridobiti vsaj eno namensko digitalno potrdilo - testno ali produkcijsko (glede na okolje na katero se ima namen povezati). O številu potrebnih digitalnih potrdil se odloča zavezanec samostojne glede na svoje potrebe. Postopek pridobivanja digitalnih potrdil je opisan v poglavju 2. / *Persons liable shall acquire at least one digital certificate for invoice fiscal verification purposes – test or production (in connection with the environment, to which they intend to connect). Persons liable decide about the number of necessary digital certificates independently on the basis of their needs. The procedure for acquiring digital certificates is described in Chapter 2.*
2. Po prevzemu digitalnih potrdil jih zavezanec namesti na svoje okolje. / *After accepting digital certificates persons liable install them into their environments.*
3. Zavezanec prevzame digitalna potrdila/javne ključe ISFU za produkcijsko oziroma testno okolje. / *Persons liable accept digital certificates/public keys of ISFU for production/test environment.*
4. Priporočamo, da šele po minimalno dveh dnevih neprekinjenega in stabilnega delovanja v testnem okolju preide zavezanec na produkcijsko okolje. / *We recommend persons liable to transfer to the production environment only after at least two days of uninterrupted and stable working in the test environment.*

## 8. SPOROČILA V JSON OBLIKI / MESSAGES IN JSON FORM

Na voljo je tudi uporaba REST API-ja. Za komunikacijo se uporablja HTTPS protokol. API uporablja metodi POST in GET. Kadar uporabljamo metodo POST, napolnimo telo z JSON objektom. V primeru metode GET, vpišemo parametre v URL. / *Application of REST API is also available. HTTPS protocol is used for communication. API uses POST and GET methods. When we use POST method, we fill the body with JSON object. In cases of GET method, we enter parameters in URL.*

V HTTP header zapišemo tudi tip vsebine / *We include also the content type into HTTP header:*

```
Content-Type = application/json; charset=UTF-8
```

Standard kreiranja JSON telesa / Creation standard of JSON body: <http://json-schema.org/> (shema v prilogi / *schema attached*)

Standard podpisovanja JSON objekta / *Signing standard of JSON object:* <http://www.rfc-editor.org/info/rfc7515>

Za zagotavljanje istovetnosti, je potrebno vsebino, ki jo pošiljamo podpisati s privatnim ključem namenskega digitalnega certifikata. Podpis se izvede po standardu JWS (JSON web signature). / *For purposes of providing identification it is necessary to sign the content, which we send, with the private key of the digital certificate for invoice fiscal verification purposes. The signature is performed on the basis of JWS standard (JSON web signature).*

Sporočilo mora biti v obliki JSON objekta / *Message shall be in the form of JSON object: { "token": "JWT" }.*

JWT(json web token) je sestavljen na sledeč način / *is completed in the following way:*

```
BASE64URL(UTF8(JWS Protected Header)) || '.' ||  
BASE64URL(JWS Payload) || '.' ||  
BASE64URL(JWS Signature)
```

V JWS Protected Header postavimo podatke o načinu podpisovanja in podatek o certifikatu. V JWS Payload postavimo vsebino našega računa/poslovnega prostora. Podpis dobimo tako da z algoritmom SHA256 podpišemo združeno vsebino JWS Protected Header-ja in JWS Payload-a. / *We include data about the signing method and data about the certificate into JWS Protected Header. We include the content of our invoice/business premises into JWS Payload. We get the signature in such a way that we sign the united content of JWS Protected Header and JWS Payload with SHA256 algorithm.*

### 8.1. JWS HEADER

Primer za JWS Header / *Example for JWS Header:*

```
{ "alg": "RS256",  
  "subject_name": "CN=ITM STORITVE\\, SPELA PERGAR S.P.,2.5.4.5=#130131,OU=99999862,O=state-institutions,C=SI",  
  "issuer_name": " CN=Tax CA Test, O=state-institutions, C=SI ",  
  "serial": 2575988469811686647 }
```

Parameter "alg" nam pove vrsto digitalnega podpisa algoritma. Algoritem mora biti "RS256", kar je oznaka za RSA PKCS#1 z SHA-256 hash algoritmom. "Subject\_name", "issuer\_name" in "serial" so podatki iz certifikata. / *»alg« parameter provides the type of algorithm's digital signature. Algorithm shall be "RS256", which is a mark for RSA PKCS#1 with SHA-256 hash algorithm. "Subject\_name", "issuer\_name" and "serial" are data from the certificate.*

V odgovorih s strani ISFU se bo v JWS Header-ju pojavil še parameter "x5c", kateri vsebuje certifikat v base64. / *In responses from ISFU »x5c« parameter will also appear in JWS Header, which includes a certificate in base64.*

Odgovor s strani ISFU bo v obliki JSON objekta / *The response from ISFU will be in the form of JSON object: { "token": "JWT "}*.

```
AglCAglCB9CiAglCAglCAglCAglIH0KICAgICAgICB9CiAglCAglCAg.q16nLMrSfnWjcJbVITEjux1o3HLMdgOQk8zJARWw461V7FMQ
UaunyEqUxs4_2gks5ke1xE9ueSSlgnKA1_ZprEGd8XG1SuMAYwFMa0WmG03go-elBp8GfTlPm2sKQ0j9m-mdshdMD-
VmaIWlY0cmY3lCGlxwc6gu0BN-w8vHj6cYQdKVAYAL7oQWst521-
U5oyajCgixN2tdpVWJ74tOeNsQS2Y39NzvXk6MIF545J0FxyBQBzPoTdiVjEALcMq2afesCSM7T_CeVj2D9f0ATiuT4ZeGsLg3Yt_tT
6ZaBjRDOEK9xNok3VD5Csn01_uqh_CXoFJ9tWrbXFOMWJNv_A"}
```

Dekodiramo JWS Payload (drugi del) iz formata base64url ter dobimo sledeče / *We decode JWS Payload (second part) from base64url format and we get:*

Sporočilo ni v skladu s shemo JSON = *Message is not in compliance with JSON schema.*

```
{ "BusinessPremiseResponse": {
  "Header": {
    "DateTime": "2015-08-25T13:56:10.311Z",
    "MessageID": "4e64a93a-40fa-4c02-afb1-488534b85e4c"
  },
  "Error": {
    "ErrorCode": "S002",
    "ErrorMessage": "Sporočilo ni v skladu s shemo JSON" }}}}
```

## 9.7. PRIMER SPOROČILA TIPA »ECHO« / EXAMPLE OF »ECHO« TYPE MESSAGE

Pošljemo sporočilo s HTTP headerjem / *We send the message with HTTP header Content-Type = application/json; charset=UTF-8.*

Sporočilo / *Message:*

```
POST /v1/cash_registers/echo HTTP/1.1
Host: blagajne-test.fu.gov.si:9002
Content-Type: application/json; charset=UTF-8
{"EchoRequest":"furs"}
```

## 9.8. PRIMER ODGOVORA NA SPOROČILO TIPA »ECHO« / EXAMPLE OF THE RESPONSE TO »ECHO« TYPE MESSAGE

ISFU pošlje kot odgovor naslednje sporočilo / *ISFU sends the following message as the response:*

```
{"EchoResponse": "furs"}
```

## 10. ZAŠČITNA OZNAKA IZDAJATELJA RAČUNA / PROTECTIVE MARK OF THE INVOICE ISSUER

Zaščitna oznaka izdajatelja računa (ZOI) je alfa numeričen zapis, ki ga mora izračunati izdajatelj računa. Prav tako ga mora izpisati na računu in sporočiti na finančno upravo v sporočilu računa. / *The protective mark of the invoice issuer (ZOI) is an alphanumeric record, which shall be calculated by the invoice issuer. This person shall also print it on the invoice and submit it to the financial administration in the invoice message.*

Namen oznake je generiranje enolične oznake, ki pa jo lahko ponovno generira samo izdajatelj računa. Uporablja se tudi za preverjanje pristnosti računa preko spletnega servisa. V tem primeru se uporabi kombinacija ZOI in davčna številka izdajatelja računa. / *The purpose of the mark is generating a uniform mark, which can be generated again only by the invoice issuer. It is used also for checking authenticity of the invoice via the web service. In this case the combination of ZOI and tax number of the invoice issuer is used.*

Da zagotovimo enoličnost kode je potrebno upoštevati nekaj parametrov / *To provide uniformity of the code, it is necessary to take some parameters into consideration:*

1. Enoličnost računa: davčna številka, datum in čas izdaje računa, zaporedna številka računa, oznaka poslovnega prostora, oznaka elektronske naprave izdajatelja računa, znesek računa. / *Uniformity of the invoice: tax number, date and time of issuing the invoice, sequence invoice number, mark of business premises, mark of the electronic device of the invoice issuer, amount of the invoice.*
2. Pristnost izdajatelja: elektronski podpis z namenskim digitalnim potrdilom izdanem s strani MJU za namen davčnega potrjevanja računov / *Authenticity of the issuer: electronic signature with the digital certificate for invoice fiscal verification purposes issued by the MJU for the purpose of fiscal verification of invoices.*

Pri izračunu ZOI-ja se uporablja UTF-8 kodiranje. Pri vnosu skupnega zneska se uporablja decimalna pika (321.45). Za elektronski podpis uporabljamo RSA-SHA256 algoritem za podpisovanje. / *At calculation of ZOI UTF-8 coding is used. At entry of the total amount the decimal dot is used (321.45). We use RSA-SHA256 algorithm for signing for the electronic signature.*

Uporabi se MD5 hash funkcija (po standardu RFC 1321 The MD5 Message-Digest Algorithm), ki vrne rezultat 32 znakovni zapis v hekso formatu. / *MD5 hash function (according to the standard RFC 1321 The MD5 Message-Digest Algorithm) is used, which returns the result 32-character record in hexa notation.*

Primer zaščitne oznake izdajatelja / *Example of issuer's protective mark:*

48c7d8888809f95edae149fa14e17a43

Algoritem za izračun ZOI-ja je možno zapisati kot / *It is possible to record the algorithm for ZOI calculation as:*

MD5hash (elektronsko podpisano s privatnim ključem / *electronically signed with the private key*  
(taxnumber + IssueDateTime + InvoiceNumber + BusinessPremiseID + ElectronicDeviceID  
+InvoiceAmount ))

Sledita dva primera implementacije, eden v Javi, drug pa v .NET tehnologiji. / *There are two examples of implementation, one in Java and the other in .NET technology.*

## 10.1. PRIMER JAVA / JAVA EXAMPLE

Začetek / start Preberi dačno številko / Read the tax number vmesni rezultat = intermediate result  
Čas izdaje računa, ki je naveden na računu = Time of issuing the invoice, which is stated on the invoice  
Preberi zaporedno številko računa = Read the sequence number of the invoice  
Oznaka poslovnega prostora = Mark of business premises  
Preberi oznako elektronske naprave za izdajanje računov = read the mark of the electronic device for issuing invoices  
Preberi skupni znesek računa = read the total amount of the invoice

```

## 11. IZPIS QR KODE, PDF417 KODE in CODE 128 / *PRINTING QR CODE, PDF417 CODE and CODE 128*

Citat 5.člena šestega odstavka Pravilnika o izvajanju Zakona o davčnem potrjevanju računov:

»Zaščitna oznaka izdajatelja računa se na računu navede v tekstovni obliki (32 znakov v šestnajstiškem zapisu) in v obliki QR kode, kode PDF 417 ali več črtnih kod tipa Code 128 v skladu s tehničnimi navodili, objavljenimi na portalu eDavki. Kodi QR in PDF 417 morata biti skladni s standardom ISO/IEC 15415. Koda Code 128 mora biti skladna s standardom ISO/IEC 15416. Koda se navede pod tekstovno obliko zaščitne oznake izdajatelja računa.«

*Unofficial translation of article 5 paragraph 6 of the Regulation on the implementation of the Act on fiscal verification of invoice:*

*»The protective mark of the invoice issuer is stated on the invoice in the text form (32 characters in the hexadecimal notation) and in the form of QR code or PDF417 code or code 128 in accordance with technical characteristics published on eDavki portal. QR Code and code PDF417 must be printed in accordance with ISO/IEC 15415 standard. Code 128 must be printed in accordance with ISO/IEC 15416 standard. Code must be printed beneath the protective mark of the invoice issuer.«*

Vse tri predvidene kode vsebujejo podatkovni zapis v dolžini 60 numeričnih mest, ki je stavljen iz 4 delov / *Printed code contains a data record spanning 60 numerical places, which includes 4 parts:*

- ZOI iz šestnajstiškega zapisa pretvoren v desetiški zapis (dolžina 39) / *ZOI converted from hexadecimal notation to decimal notation (length 39),*
- davčna številka zavezanca (8 mest) / *tax number of the person liable (length 8)*
- datum in čas izdaje računa v obliki LLMMDDUUMMSS (12 mest) / *date and time of issuing invoice in the form LLMMDDUUMMSS (length 12),*
- kontrolni znak, izračunan kot vsota vseh števil po modulu 10 / *control character, calculated as sum of all numbers modulo 10.*

Primer / *Example:*

ZOI: a7e5f55e1dbb48b799268e1a6d8618a3

→ desetiško / *decimal notation:* 223175087923687075112234402528973166755

Davčna številka / *Tax number:* 12345678

Datum / *Date:* 15.8.2015, 10:13:32

Podatkovni zapis/ *Data record:* 223175087923687075112234402528973166755123456781508151013321

Zadnji kontrolni znak je 1. / *Control character is 1.*

Izpis QR kode / *Printing QR code:*

QR koda je sestavljena iz 25 x 25 modulov z ravnijo odprave napak »M«. Posamezen modul mora biti natisnjen z ločljivostjo vsaj 4 x 4 pik in minimalna velikost natisnjene QR kode mora biti vsaj 14 mm x 14 mm. QR koda mora biti obdana s prazno obrobo v velikosti vsaj 4 x velikost modula in minimalna velikost prazne obrobe mora biti vsaj 2 mm. Izpisana QR koda ne sme vsebovati slike ali logotipa. / *QR code includes 25 x 25 modules with "M" level of error correction. Each module must be printed with a resolution of at least 4 x 4 dots and the printed size of QR code must be at least 14 mm x 14 mm. QR code must be rounded by a quiet zone in a size of at least 4 x module size and in a size of at least 2 mm. Printed QR code may not contain a picture or logo.*

Izpis PDF417 kode / Printing PDF417 code:

PDF417 koda lahko vsebuje od 5 do 33 vrstic. Za generiranje kode se uporabi raven odprave napak 2. Širina posameznega modula X mora biti natisnjena z ločljivostjo najmanj 2 piki in velikostjo najmanj 0,25 mm (modul X je najožji navpični element v simbolu kode). Višina posameznega modula X mora biti natisnjena z ločljivostjo najmanj 10 pik in velikostjo najmanj 1,25 mm. Koda PDF 417 mora biti obdana s prazno obrobo v velikosti vsaj dveh širin modula X. / *Code PDF417 may contain from 5 to 33 rows. Code must be generated with error correction level 2. Width of each module X must be printed with a resolution of at least 2 dots and with size of at least 0,25 mm (module X is the narrowest vertical element of the code symbol). Height of each module X must be printed with a resolution of at least 10 dots and with a size of at least 1,25 mm. Code PDF417 must be rounded by a quiet zone in a size of at least 2 x width of module X.*

Izpis Code 128 / Printing Code 128:

Podatki se lahko natisnejo v 2 do 6 kodah, odvisno od širine papirja (2 x 30 podatkovnih mest ali 3 x 20 ali 4 x 15 ali 5 x 12 ali 6 x 10). V vsaki kodi zasedajo prva 2 oziroma prva 3 mesta kontrolni znaki, ostalo so podatki, posledično je skupno število mest vedno sodo, kar omogoča zgoščeni tisk v kodnem nizu C. / *Data can be printed in 2 to 6 codes, depending on the width of the paper (2 X 30 data places or 3 X 20 or 4 X 15 or 5 X 12 or 6 X 10). First 2 or first 3 places in each code are control characters the rest is data, consequently the total number of places will always be even, enabling concentrated print in the code set C.*

Pri izpisu podatka v 2,3,5 ali 6 kodah mora biti na prvem mestu vedno fiksna predpona 4, na drugem mestu pa zaporedna številka črtne kode. V primeru izpisa podatka v 4 kodah, mora biti na prvih dveh mestih vedno fiksna predpona 44, na tretjem mestu pa zaporedna številka črtne kode. / *If data is printed in 2,3,5 or 6 codes then there must always be prefix 4 on the first place and consecutive code number on the second place. If data is printed in 4 codes then there must always be prefix 44 on the first two places and consecutive code number on the third place.*

Primer zapisa 3 kod / Example of printing 3 codes:

4122317508792368707511  
4222344025289731667551  
4323456781508151013321

Primer zapisa 4 kod / Example of printing 4 codes:

441223175087923687  
442075112234402528  
443973166755123456  
444781508151013321

Širina posameznega modula X (modul X je najožji navpični element v simbolu črtne kode) mora biti natisnjena z ločljivostjo najmanj 2 piki. Višina posameznih kod je najmanj 3,5 mm. Med njimi mora biti prazen prostor najmanj 1 mm. Črtne kode Code 128 morajo imeti svetle robove pred prvo črto in za zadnjo črto v velikosti najmanj 10 modulov X ali 6 mm (kar od tega je več).

*/ Width of each module X (module X is the narrowest vertical element of the bar code symbol) must be printed with resolution of at least 2 dots. Height of each individual code must be at least 3,5 mm. Between each individual code there must be an empty space in a size of at least 1 mm. Code 128 barcode must have quiet zones before the first line and after the last line in a minimum of 10 modules X or 6 mm (whichever of them is larger).*

Če se na računu tiskajo tudi druge črtne kode za komercialne ali druge namene, te ne smejo biti tipa Code 128 z enako začetno predpono in dolžino kot se uporablja za tiskanje oznake ZOI v kodi 128. / *There should be no other Code 128 codes on the invoice with the same initial prefix and the same length as used for printing ZOI in Code 128.*

Berljivost kode (QR, PDF417, Code 128) je moč preveriti z uporabo testne FURS aplikacije za preverjanje kode ali z uporabo FURS aplikacije za preverjanje računov. Aplikaciji morata biti nameščeni na pameten mobilni telefon s kamero ločljivosti največ 5MP in avtofokusom. Podprte so naslednje platforme: Android 4.1 in višje, Windows Phone 8.1 in višje, IOS 7.1.1 in višje. / *Readability of the printed code ((QR, PDF417, Code 128) can be checked by using FURS application for code verification or by using FURS application for invoice verification. Either application should be installed on a smartphone with a max. 5MP camera and an autofocus. Following platforms are supported: Android 4.1 and higher, Windows Phone 8.1 and higher, IOS 7.1.1 and higher.*

Ustreznost kode glede na opredeljena ISO standarda se lahko preveri pri za to usposobljeni neodvisni strokovni organizaciji – Zavod za identifikacijo in el. izmenjavo podatkov GS1 Slovenija. / *Printed codes may be verified according to defined ISO standards at the qualified independent professional organization - Zavod za identifikacijo in el. izmenjavo podatkov GS1 Slovenija.*
